The Cambro® Story

Cambro was founded by two brothers, Bill and Argyle Campbell in 1951 when Bill invented the Camtray® and Argyle began selling the tray to the American Hospital Supply Corporation. The Camtray was quickly embraced by restaurant, hotel, school, and cafeteria operators, and it became the industry standard. Growing from this heritage, today we offer the most complete line of sizes, shapes, colors and materials in foodservice trays throughout the world.

Bill's creativity was the driving force behind new product development. During the 1960's, Cambro introduced Camcover® plate covers, drinkware, dinnerware and serving bowls to provide operators with long lasting tableware and serving items. Cambro also created the first plastic food pan and the first clear food storage container.

Cambro combined plastic molding with foam insulation in the early 1970's to create the first Camtainer®. This was the beginning of our full line of insulated food and beverage containers that keep hot food hot or cold food cold for holding, transporting and catering.

Our tradition of innovation continues to this day. Every Cambro product is engineered to help foodservice operators increase sales and profits, reduce labor and improve safety. This has led us to industry innovations in storage, such as the FlipLid®, GripLid®, and SlidingLid™; in merchandising with the CamKiosk® and portable CamBars®; and with revolutionary products like the Camrack® closed-wall warewashing system, Camshelving® and thermoelectric Camtherm® holding cabinets.

In the late eighties, Cambro began to export. Cambro acquired Presswerk Köngen in 1997 and Ozay Manufacturing in 2004. We now manufacture a number of our products overseas to be marketed throughout Europe and Asia, respectively. All our products are available worldwide, and a global approach is a significant part of our growth strategy.

Over the last fifty-eight years, Cambro has grown from one product, the Camtray, to thousands of products; from one salesman to a global sales and distribution network; from two presses in a small shop to a number of manufacturing capabilities around the world. Despite this extensive growth, we remain committed to creating and providing the most durable and highest quality products for the foodservice industry. And Argyle Campbell, the late Bill Campbell's son, stands at the helm of Cambro to continue the Campbell brothers' vision.

Components

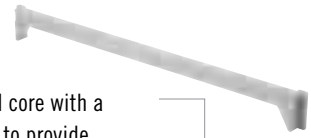
Camshelving® is a modular system that allows the flexibility to assemble shelving to fit any size area. The key components, including posts, post connectors, traverses and shelf plates, are available in a variety of sizes. They can be easily configured to custom build shelving to maximize storage space. Unique design elements such as shared posts and corner connectors simplify assembly and increase storage capacity.

TRAVERSES

Traverses have a steel core with a polypropylene exterior to provide strength and durability.

Traverses connect to the post by sliding on to the dovetail on the post.

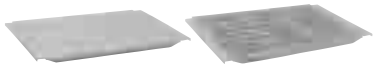
Two traverses are needed to build one shelf, and they define the length of the unit.

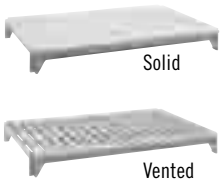


SHELF PLATES

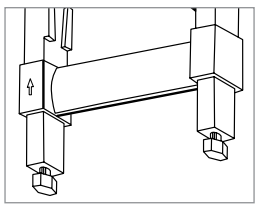
Shelf Plates are made of polypropylene.

Dishwasher safe.





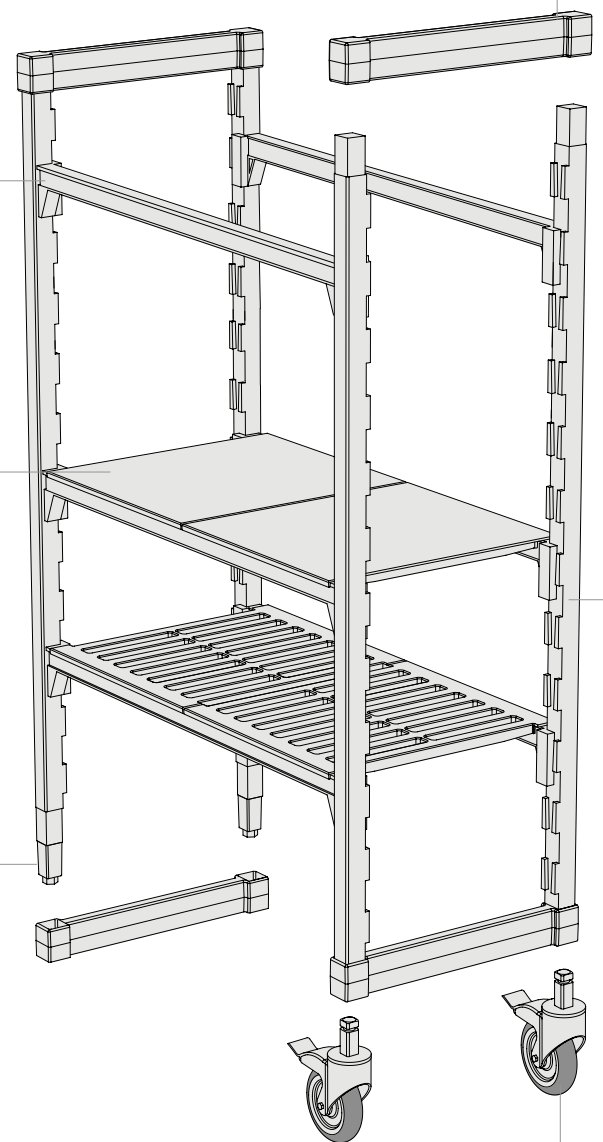
SHELF KIT
Includes two Traverses and Shelf Plates to fit the length of the Traverses



POSTS FOR STATIONARY UNIT

Posts have a steel core with a polypropylene exterior to provide strength and durability.

Posts define the height of the shelving unit and are measured with the leveling foot fully engaged.



POST CONNECTORS

Post connectors hold two posts together and define the width of the unit.

They are made of polypropylene and provide excellent cross stabilization.

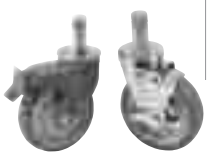
POST KIT
Includes two Posts and a set of one top and one bottom Post Connector

POSTS FOR MOBILE CAMSHELVING

Mobile Camshelving posts must be used to build mobile Camshelving units.

CASTERS

Available in standard for dry storage or premium for freezers, cold, or wet applications.

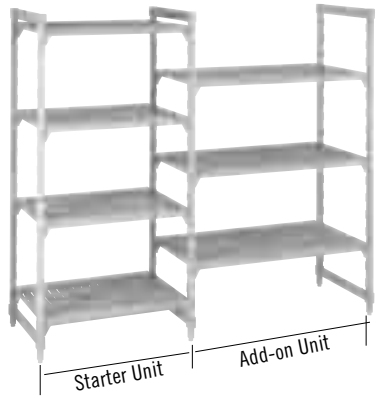


Maximize Space Utilization

Camshelving® is available in starter and add-on units for ease of ordering and assembly.

Starter Units

- Available in stationary or mobile units.
- Starter units ship complete with two post kits, traverses and shelf plates to build an entire unit.



Add-On Units

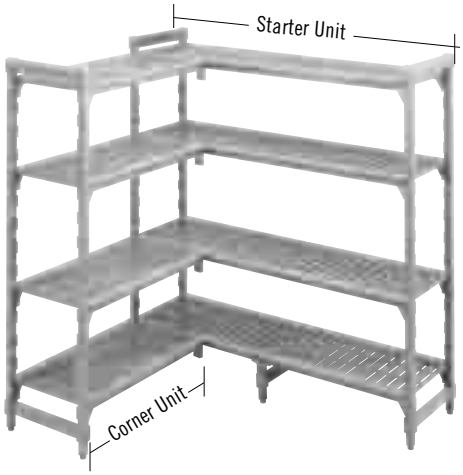
- No add-on clips or S-hooks required.
- There is no loss of weight bearing capacity when built in a straight line.



Corner Unit & U Shape Units

- Corner connectors can be used to build corner units and U Shape units.
- Traverses snap onto corner connectors just like they snap onto the dovetails of the posts.

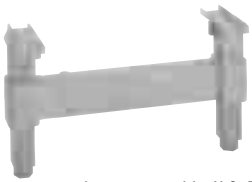
Corner Connector Set

- Attaches a basic unit to a second unit at a 90˚ angle or to form a U shape.
- A set of corner connectors are needed for each shelf.

* Corner connectors are recommended for use on traverses equal to or shorter than 48" (1220 mm), and covered by U.S. Patent D498,664S.

Dunnage Stand

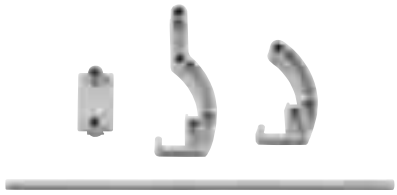
- Increases weight bearing capacity to 1000 lbs. (454 kg) on the bottom shelf.
- Recommended for units 54" (1380 mm) or longer.



* Dunnage stands are covered by U.S. Patent US 6,981,454B2.

Fence System

- Prevents stored items from falling off shelving units.
- Ideal for mobile shelving.



Mobile Units

- Mobile Camshelving units are built by using posts for mobile carts and inserting casters.

Camwear® Polycarbonate Food Pans

Store, transport and serve all in one pan. Camwear food pans are made from durable polycarbonate that will not crack, bend or dent. Precisely designed to Gastronorm GN specifications, with a large radius bottom to reduce food waste. At half the cost of stainless steel, Camwear pans keep contents as cold as metal pans with less condensation. Pans stack neatly without wedging or sticking.

Colors: Clear (135), White (148), Black (110). Except 18CW and 28CW available in Clear (135) only.

Camwear pans are not recommended for steam table or microwave use. See H-Pan™ section for these high heat applications.

Uniform ½" (1.27 cm) flange ensures a smooth fit in prep tables and food bars.

Molded-in graduations in standard & metric for easy inventory management.

Won't react with food; minimizes potentially hazardous chemical or acidic reaction.

Non-stick smooth interior surface increases yields and promotes easy cleaning.

Textured bottoms resist scratching.

Save Electricity with Camtherm!

In an independent laboratory test, Camtherm was tested against a same-capacity, leading metal cabinet for energy efficiency. Over the course of eight hours of holding, the Camtherm cabinet used 48% less electricity than a leading metal cabinet.

Total energy usage of the Camtherm Cabinet was 38% less than the metal cabinet when consumption was measured for preheating, loading, and the eight hour holding period.

Model	Total Energy Consumption Over 8 Hours
Camtherm	2.06 kilowatt hours
Metal Cabinet	3.95 kilowatt hours

Marine rail is designed for use during service, not transport.

Top marine rail on all units holds 2 full-size food pans, one sheet pan or one cutting board (CB1220).

Solar powered, digital display thermometer monitors internal cabinet temperature.

Self-ventilating cap on each cabinet door automatically releases steam and equalizes pressure, maintaining food quality.

Door swings open 270˚ for easy loading.

Menu clip holds routing directions or list of cabinet contents.

Ergonomic molded-in handles are at a safe height on both low and tall profile units for easy transporting, even when fully loaded.

Heavy-duty, 14 gauge electrical cord is 9' (274,3 cm) long. Wrapping hook is located on back of each cabinet for safe cord storage.

Wide, nylon door latches and magnetic door gaskets lock doors securely and create a tight seal to retain safe hot or cold food temperatures.

Non-marking, high modulus, rubber casters are strong and extremely durable, providing smooth transport of full cabinets from kitchen to serving location.

Easy-to-use control panel is located on back of each unit. Includes *on/off* switch, *hot/cold* switch for *hot/cold* units only and a temperature control dial for hot only. Cold performing units are factory set to chill cabinet to 37˚F (2,8˚C).

Anodized aluminum uprights and removable, adjustable chrome plated steel slide rails hold full-size food pans or sheet pans.

Tough, one-piece, seamless double-wall polyethylene exterior is easy to clean and won't dent, crack, rust, chip or break.
